POST-TREATMENT CONDITION REPORT

—

Overall Condition:

This graphite drawing on paper is in good condition overall.

Structural Condition:

The paper is structurally intact and does not present tears, paper losses, or planar distortions. There is an area of adhered paper in the right edge which appears to be original to the execution of the artwork.

Visual Condition:

The paper is moderately oxidized from contact with acidic material and a natural process of aging due to light exposure. This is visible throughout the sheet with occasional mild oil and adhesive stains in places in the recto. The medium remains well preserved overall.
